

## **PUMA-2398** Hot-swap 10Ah Lead Crystal Battery

- 
- 28V DC output
- Hot swap 'Power Pole' connection
- Front mounted fixings for rugged security
- Easy extraction handle
- Wide -46C to 75C temperature range
- shock and vibration for harsh environments

### **Description**

The on-systems EAGLE UPS is a configurable, modular, EMI silent power supply. With dual 80 to 264V AC and wide range 10 to 38V DC inputs, the EAGLE will provide a 28V output from all sources.

EMI filtering to DEF-STAN 59-411Land Class B and MIL-STD 461F, with TEMPEST ensures the unit is suitable for all situations.

The modular integrated, hot swappable PUMA-2398 power cells give from 40 minutes to hours of autonomy in temperatures from -46C to +75C, utilising the latest lead crystal technology

Batteries MUST be removed from the UPS during flight.
